

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (canceled)

Claim 2 (canceled)

Claim 3 (currently amended): ~~The sign of claim 1,~~ A sign, comprising:

a housing;

a cover having at least one cover cutout; and

at least one symbol plate adapted to attach to said housing in at least two orientations relative to said housing, the at least two orientations including a first position, and a second position that is 90 degrees to the first position;

wherein said at least one symbol plate includes a visual representation of at least one symbol, said cover is adapted to attachably engage said housing with said at least one symbol plate disposed between said cover and said housing, when said cover is engaged with said housing, the at least one cover cutout is oriented to expose the visual representation of the at least one symbol; wherein said housing includes at least one slot, and said at least one symbol plate includes at least one tab adapted to attachably engage said at least one slot.

Claims 4-5 (canceled)

Claim 6 (currently amended): ~~The sign of claim 4, further comprising~~ A sign,
comprising:

a housing;

a cover having at least one cover cutout;

at least one symbol plate adapted to attach to said housing in at least two
orientations relative to said housing, the at least two orientations including a first
position, and a second position that is 90 degrees to the first position; and

at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said cover is adapted to attachably engage said housing with said at least one
symbol plate disposed between said cover and said housing, when said cover is engaged
with said housing, the at least one cover cutout is oriented to expose the visual
representation of the at least one symbol, said at least one symbol plate includes at least
one symbol plate cutout that provides the visual representation of the at least one symbol,
said housing includes a light source that emits light waves, of at least one color, and that
pass through at least a portion of the at least one symbol plate cutout when said at least
one symbol plate is attached to said housing, and wherein, when disposed between the
light source and the at least one of said at least one symbol plate, said at least one sheet

diffuses a portion of the light waves to prevent visual perception of the light source as a distinct image.

Claim 9 (currently amended): ~~The sign of claim 1, further comprising A sign,~~
comprising:

a housing;

a cover having at least one cover cutout;

at least one symbol plate adapted to attach to said housing in at least two orientations relative to said housing, the at least two orientations including a first position, and a second position that is 90 degrees to the first position; and

a deluxe plate having at least one deluxe plate cutout;

wherein said at least one symbol plate includes a visual representation of at least one symbol, said cover is adapted to attachably engage said housing with said at least one symbol plate disposed between said cover and said housing, when said cover is engaged with said housing, the at least one cover cutout is oriented to expose the visual representation of the at least one symbol, said deluxe plate is adapted to attachably engage said housing with said at least one symbol plate and said cover disposed between said deluxe plate and said housing, and wherein, when said deluxe plate is engaged with said housing, the at least one deluxe plate cutout is oriented to expose the visual representation of at least one symbol.

Claim 10 (previously presented): The sign of claim 9,
wherein said at least one symbol plate includes at least one symbol plate cutout
that provides the visual representation of the at least one symbol; and
wherein said housing includes a light source that emits light waves, of at least one
color, and that pass through at least a portion of the at least one symbol plate cutout when
said at least one symbol plate is attached to said housing.

Claim 11 (previously presented): The sign of claim 10, further comprising
at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;
wherein, when disposed between the light source and the at least one of said at
least one symbol plate, said at least one sheet filters one or more of the at least one color
from the light waves.

Claim 12 (previously presented): The sign of claim 10, further comprising
at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;
wherein, when disposed between the light source and the at least one of said at
least one symbol plate, said at least one sheet diffuses a portion of the light waves to
prevent visual perception of the light source as a distinct image.

Claim 13 (canceled)

Claim 14 (currently amended): ~~The sign of claim 13, wherein~~ A sign, comprising:
a housing; and
at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said at least one symbol plate includes at least one symbol plate cutout that
provides the visual representation of the at least one symbol, said housing includes a light
source that emits light waves, of at least one color, and that pass through at least a portion
of the at least one symbol plate cutout when said at least one symbol plate is attached to
said housing, said housing includes at least one slot, and said at least one symbol plate
includes at least one tab adapted to attachably engage said at least one slot.

Claim 15 (canceled)

Claim 16 (currently amended): ~~The sign of claim 15, wherein~~ A sign, comprising:
a housing; and
at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing;
wherein said at least one symbol plate includes a visual representation of at least
one symbol, said at least one symbol plate includes at least one symbol plate cutout that
provides the visual representation of the at least one symbol, said housing includes a light
source that emits light waves, of at least one color, and that pass through at least a portion
of the at least one symbol plate cutout when said at least one symbol plate is attached to
said housing, the at least two orientations include a first position, and a second position
that is 90 degrees to the first position, and said housing includes at least one slot, and said
at least one symbol plate includes at least one tab adapted to attachably engage said at
least one slot.

Claim 17 (previously presented): The sign of claim 16, further comprising
a cover having at least one cover cutout;
wherein said cover is adapted to attachably engage said housing with said at least
one symbol plate disposed between said cover and said housing, and
wherein, when said cover is engaged with said housing, the at least one cover
cutout is oriented to expose the visual representation of the at least one symbol.

Claim 18 (previously presented): The sign of claim 17, further comprising
a deluxe plate having at least one deluxe plate cutout;
wherein said deluxe plate is adapted to attachably engage said housing with said
at least one symbol plate and said cover disposed between said deluxe plate and said
housing, and
wherein, when said deluxe plate is engaged with said housing, the at least one
deluxe plate cutout is oriented to expose the visual representation of at least one symbol.

Claim 19 (canceled)

Claim 20 (currently amended): ~~The sign of claim 19, further comprising~~ A sign,
comprising:

- a housing;
- a cover having at least one cover cutout;
- at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing; and
- a deluxe plate having at least one deluxe plate cutout;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said at least one symbol plate includes at least one symbol plate cutout that
provides the visual representation of the at least one symbol, said housing includes a light
source that emits light waves, of at least one color, and that pass through at least a portion
of the at least one symbol plate cutout when said at least one symbol plate is attached to
said housing, said cover is adapted to attachably engage said housing with said at least
one symbol plate disposed between said cover and said housing, when said cover is
engaged with said housing, the at least one cover cutout is oriented to expose the visual
representation of the at least one symbol, said deluxe plate is adapted to attachably
engage said housing with said at least one symbol plate and said cover disposed between
said deluxe plate and said housing, and wherein, when said deluxe plate is engaged with
said housing, the at least one deluxe plate cutout is oriented to expose the visual
representation of the at least one symbol.

Claim 21 (currently amended): ~~The sign of claim 13, further comprising~~ A sign,
comprising:

a housing;

at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing; and

at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said at least one symbol plate includes at least one symbol plate cutout that
provides the visual representation of the at least one symbol, said housing includes a light
source that emits light waves, of at least one color, and that pass through at least a portion
of the at least one symbol plate cutout when said at least one symbol plate is attached to
said housing, and wherein, when disposed between the light source and the at least one of
said at least one symbol plate, said at least one sheet filters one or more of the at least one
color from the light waves.

Claim 22 (currently amended): ~~The sign of claim 13, further comprising~~ A sign,
comprising:

a housing;

at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing; and

at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said at least one symbol plate includes at least one symbol plate cutout that
provides the visual representation of the at least one symbol, said housing includes a light
source that emits light waves, of at least one color, and that pass through at least a portion
of the at least one symbol plate cutout when said at least one symbol plate is attached to
said housing; and wherein, when disposed between the light source and the at least one of
said at least one symbol plate, said at least one sheet diffuses a portion of the light waves
to prevent visual perception of the light source as a distinct image.

Claims 23-24 (canceled)

Claim 25 (currently amended): ~~The sign of claim 23, further comprising~~ A sign,
comprising:

a housing;

at least one symbol plate adapted to engage said housing in at least two
orientations relative to said housing; and

a cover having at least one cover cutout;

wherein said at least one symbol plate includes a visual representation of at least
one symbol, said housing includes at least one slot, said at least one symbol plate
includes at least one tab adapted to attachably engage said at least one slot, said cover is
adapted to attachably engage said housing with said at least one symbol plate disposed
between said cover and said housing, and wherein, when said cover is engaged with said
housing, the at least one cover cutout is oriented to expose the visual representation of the
at least one symbol.

Claim 26 (previously presented): The sign of claim 25,
wherein said at least one symbol plate includes at least one symbol plate cutout
that provides the visual representation of the at least one symbol; and
wherein said housing includes a light source that emits light waves, of at least one
color, and that pass through at least a portion of the at least one symbol plate cutout when
said at least one symbol plate is attached to said housing.

Claim 27 (previously presented): The sign of claim 25, further comprising
a deluxe plate having at least one deluxe plate cutout;
wherein said deluxe plate is adapted to attachably engage said housing with said
at least one symbol plate and said cover disposed between said deluxe plate and said
housing, and
wherein, when said deluxe plate is engaged with said housing, the at least one
deluxe plate cutout is oriented to expose the visual representation of at least one symbol.

Claim 28 (previously presented): The sign of claim 26, further comprising
at least one sheet adapted to be disposed between the light source and at least one
of said at least one plate;
wherein, when disposed between the light source and the at least one of said at
least one symbol plate, said at least one sheet filters one or more of the at least one color
from the light waves.

Claim 29 (previously presented): The sign of claim 26, further comprising
at least one sheet adapted to be disposed between the light source and at least one
of said at least one symbol plate;
wherein, when disposed between the light source and the at least one of said at
least one symbol plate, said at least one sheet diffuses a portion of the light waves to
prevent visual perception of the light source as a distinct image.
